## MERV Rating

Minimum Efficiency Reporting Value (MERV) is a rating system developed by the American Society of Heating, Refrigeration and Air Conditioning Engineers to give a simplistic method of comparing filters. The chart below indicates the higher the MERV rating, the more efficient the filter is at capturing larger particles.

## INSTALLATION INSTRUCTIONS

Arrows show direction of AIR FLOW through filter.

1. Remove plastic wrap and paper insert from filter. Do not cut or remove cardboard frame.

**WARNING: TO AVOID DANGER OF SUFFOCATION, KEEP THIS FILM AWAY FROM BABIES AND CHILDREN.**

2. Insert filter into the designated opening in your home furnace or air conditioning system with the arrow on the frame pointing towards the blower motor.

With all air filter purchases, be sure to refer to your heating/cooling system Owner's Manual to ensure the filter you are about to use is compatible with your system.

## Lasts Up To 90 Days

All filters trap dust and dirt which over time will create strain on your HVAC system. To prevent this, check your filter every 60-90 days. If you see build-up of dirt, it's time to replace your filter with a genuine BestAir filter.

## Questions?

For more information about this filter or any BestAir Product, please visit our website [www.BestAirUSA.com](http://www.BestAirUSA.com) or call 847-683-3400
